

THE
Automatic Shading Pen Ink Compounds.

COPYRIGHTED 1880.

I beg leave to call your attention to my special INKS, which I have compounded especially for use with the AUTOMATIC SHADING PENS.

In preparing these Compounds I have used coloring matter and ingredients of the purest kinds, so as to overcome the tendency to mould and faintness of color which I find are the difficulties met in adding common Gum Arabic to ordinary Inks.

The combinations that can be made with the various colors are many and very attractive. For Letter Headings, Diplomas, Insurance Policies, Drafts, Plans, &c., the black makes a neat and deep color.

For Card Writing, Directing Envelopes, Show Cards, Autograph Albums, Marking Fine Parcels, Announcements of any kind, &c., the Violet, Blue, Green, and Red are particularly attractive, and harmonize beautifully with the many tinted papers now in use.

They produce a rich glossy appearance that adds very much to the beautiful effects produced by the AUTOMATIC SHADING PENS.

Price of the following colors: Black, Green, Red, Blue, Purple, and Brown, 10 cents per bottle. One dozen sent by express for \$1.00 on receipt of price.

I also have Gold, Silver, and Crimson Powders, 15 cents per bottle.

For the convenience of parties living at a distance, and wishing their goods sent by mail, the following colors, Black, Blue, Purple, Red and Green, are prepared dry and need only the addition of water to produce Ink of the right thickness and of a deep brilliant color.

Full directions accompany each package.

Any or all of the colors sent postpaid for 25 cents per package, or the entire lot of five colors for \$1.00.
